

Jason Obawemimo

AI Implementation, Workflow Automation and CRM Systems

Pearland, TX | jobawems@gmail.com | jasonobawemimo.com | linkedin.com/in/obawemimo

Summary

I build the CRM, voice AI and automation systems a business runs on, and I run the operations they serve. At a Houston used vehicle dealership I've personally closed 53 vehicle sales and collected \$206,777 in sale proceeds since June 2025, while building production tools that connect lead intake, calls, scheduling, CRM records and follow-up.

Experience

Owner and Operations Lead

Aug 2024 to Present

Triple J Auto Investment and Rental Operations, Houston, Texas

- Manage operations across pricing, inventory, vendors, logistics, financing and title processing since August 2024.
- Personally closed 53 vehicle sales and collected \$206,777 in sale proceeds since June 2025.

Custom dealership CRM and Handle a Sale desk (TypeScript, React, Next.js, PostgreSQL, Supabase, Vercel, Edge Functions)

- Used daily by three staff across inventory, deals and follow-up.
- Designed the lead-to-title data model, roles and validation.
- Tested Supabase row-level security (RLS) policies to prevent unauthorized role access.
- Added validation that prevents invalid deal and inventory records from being written.
- Executed production schema migrations while preserving existing records and operational tables.
- Shipped the CRM on Vercel with Edge Functions for voice and texting webhooks.
- Handle a Sale, the CRM's sale desk, scans the buyer's license once so every form fills itself and routes each deal to the right documents with nothing missing and nothing extra.

Inbound voice AI (Retell AI, Bland AI, Twilio, CRM webhooks)

- Deployed inbound voice AI that books appointments into the CRM and live-transfers unresolved calls to staff.
- Across August and September 2026 the voice AI averaged 41 inbound calls, 14 booked appointments and 4 CRM-matched vehicle sales per month (\$15,000 a month in sale proceeds).

Prospecting workflow (Python, Claude API, n8n, CRM webhooks)

- Built a prospecting workflow in Python with the Claude API and n8n that researches Facebook Marketplace leads and writes findings to the CRM.
- The workflow generates SOP-based reply text for automatic follow-up.

Education

The University of Texas at Austin, Austin, TX

Expected 2028

Bachelor of Science in Neuroscience

San Jacinto College, Houston, TX

May 2026

Associate of Arts in Business, GPA 3.63, Dean's Honor List

Certificates and Courses

- Google AI Essentials, Google (Coursera), 2026
- Anthropic: nineteen completed courses, including Building with the Claude API; Claude Code in Action

Skills

Languages: TypeScript, JavaScript, Python, SQL

Web and data: React, Next.js, PostgreSQL, Supabase, Vercel

Backend: Edge Functions, REST APIs, row-level security (RLS), webhook services

Automation: n8n, API integrations, Retell AI, Bland AI, Twilio

AI development: Claude Code, Claude API, Codex

Operations: Dealership operations, sales pipelines, inventory and vendor management
