

Jason Obawemimo

Builder and operator focused on AI voice agents, conversion-focused web systems, and the operational workflows that turn missed calls, cold leads, and manual follow-up into booked opportunities.

FOCUS Voice AI	SYSTEMS Supabase, PostgreSQL, Vercel	OPERATING LENS Revenue, follow-up, SOPs
-------------------	---	--

EXPERIENCE

Founder / AI Systems Builder

SEP 2024 - PRESENT

AI Automation, Voice Agents & Business Systems

- Build AI voice agents that answer inbound calls, qualify leads, route requests, and book appointments for service businesses.
- Ship conversion-focused websites and landing pages with lead capture, CRM/database handoffs, and Vercel production deployments.
- Develop agentic workflows using Claude, Codex, MCP, Supabase, PostgreSQL, CLI tooling, and documentation systems.
- Translate owner-operator workflows into SOPs, intake scripts, follow-up logic, and reporting structures tied to revenue.

Co-Owner / Operator

AUG 2024 - PRESENT

Triple J Auto Investment & Rental Operations

- Manage rental and dealership workflows across pricing, customer intake, scheduling, payments, and follow-up.
- Negotiate pricing and financing options while protecting margin and maintaining customer trust.
- Coordinate leads, inventory, vendors, and client relationships across active business lines.
- Improve operating cadence with documentation, clearer handoffs, and repeatable customer processes.

SELECTED WORK

Voice agents for service businesses AI reception workflows for lead qualification, FAQ resolution, routing, and appointment booking.	High-ticket web systems Positioning, UX copy, lead capture, and database handoffs for conversion-focused web experiences.	Triple J operating systems Intake scripts, reporting structures, documentation, and SOPs for dealership and rental operations.
