

Jason Obawemimo

AI Engineer. Business Systems and Sales Intelligence.

AI engineer and business operator who has built dealership and rental software through AI-assisted development. Work starts with a process audit: understand the business, find the bottlenecks, and design the system. Now developing Obavia, a sales intelligence platform.

EXPERIENCE

Founder

SEP 2024 - PRESENT

Obavia (obavia.co). Business Systems and Sales Intelligence

- Audit existing processes to understand where work gets delayed, information gets lost, or staff repeat tasks that AI could help handle.
- Turn those findings into workflow requirements and operating procedures. Built AI-assisted workflows for customer intake, qualification, follow-up, and CRM and data handoffs.
- In development: Obavia, a sales intelligence platform that turns this business-specific work into a repeatable product for appointment setters, closers, and owners.
- Design how the system identifies meaningful word choices, stated interests, and motivations in sales conversations, then gives reps relevant context for what to say or ask next.
- Define coaching and reporting around each sales stage and revenue per lead, so managers can see where opportunities stall and where reps need support.

Co-Owner and Operator

AUG 2024 - PRESENT

Triple J Auto Investment and Rental Operations (thetripjauto.com)

- Built software for the dealership and a former rental operation by defining business requirements and directing AI-assisted development.
- Run daily dealership operations, including customer intake, vehicle pricing, inventory, scheduling, and vendor coordination.
- Write intake scripts and procedures that carry customer information through sales follow-up and title and registration support.
- Negotiate vehicle prices and financing options, balancing customer needs with the margin on each sale.

EDUCATION

Associate of Arts, Business

San Jacinto College, Houston, TX

Graduated May 2026 | GPA 3.63 | Dean's Honor List

CORE SKILLS

AI and automation

- AI-assisted development
- Prompt engineering
- Workflow automation
- Conversation-intelligence design
- Human review checkpoints

Business systems

- Process audits
- Requirements gathering
- Process mapping
- CRM and data handoffs
- Standard operating procedures
- Sales negotiation
